

EVALUATIONS OF SRI BY CHINESE SCIENTISTS

NOT A COMPLETE LISTING YET – most are in Chinese language

- Chen, H.Z., D.F. Zhu, L.B. Rao, X.Q. Lin and Y.P. Zhang (2006). Effects of SRI technique on population quality after heading stage and yield formation in rice. *Journal of Huazhong Agricultural University*, 25: 483-487, with English summary.
- Li X.Y., X.L. Xu and H. Li (2005). A socio-economic assessment of the System of Rice Intensification (SRI): A case study of Xinsheng Village, Jianyang County, Sichuan Province. Report for College of Humanities and Development, China Agricultural University, Beijing. (<http://ciifad.cornell.edu/sri/countries/china/cnciadeng.pdf>)
- Liang Y.M., Lin X.Q., Sun Y.F., Zhu D.F. and Shi G.A. (2004). Study on yield and its components of Xieyou 9308 under the system of rice intensification. *Chinese Agricultural Science Bulletin*, 20: 84-86.
- Liang Y.M., Lin X.Q. and Sun Y.F. (2006). Effects of different crop management on dry matter accumulation and plant type characteristics of rice (*Oryza sativa* L). *Acta Agriculturae Zhejiangensis* 18: 82-85 .
- Lin X.Q., Zhu D.F. and Zhou W.J., 2003. Relationship between specific leaf weight and photosynthetic rate at panicle initiation stage in super hybrid rice. *Chinese Journal of Rice Science* 17: 281-283.
- Lin X.Q., Zhou W.J., Zhu D.F. and Zhang Y.P. (2004). Effect of water management on photosynthetic rate and water use efficiency of leaves in paddy rice. *Chinese Journal of Rice Science* 18: 333-338.
- Lin X.Q., Zhou W.J. and Zhu, D.F. (2005). The photosynthetic rate and water use efficiency of leaves at different position at panicle initiation stage under the System of Rice Intensification (SRI). *Chinese Journal of Rice Science* 19: 200-206.
- Lin X.Q., Zhou W.J., Zhu D.F. and Zhang, Y.P. (2005). Effect of SWD irrigation on photosynthesis and grain yield of rice (*Oryza sativa* L.). *Field Crops Research* 94: 67-75.
- Lin X.Q., Zhou W.J., Zhu D.F., Chen H.Z. and Zhang Y.P. (2006). Nitrogen accumulation, remobilization and partitioning in rice (*Oryza sativa* L.) under an improved irrigation practice. *Field Crops Research* 96: 448–454.
- Lu C.G. and Zou J.S. (2003). Comparative analysis on rice plant type of two super hybrids and Shanyou 63. *Agricultural Science in China*, 2: 513-520.
- Lin, X.Q., W.J. Zhou and D.F. Zhu (2005). The photosynthetic rate and water use efficiency of leaves at different position at panicle initiation stage under the System of Rice Intensification (SRI). *Chinese Journal of Rice Science* 19: 200-206.
- Long, X., J. Ma, F.Y. Xu, H.Z. Wang, Q.L. Huang and Z.X. Yuan (2005). Study on the seedling-age and planting density in SRI. *Journal of Sichuan Agricultural University*, 23: 365-373.
- Lu X.M., Q. Huang and H.Z. Liu (2006). Research of some physiological characteristics under the system of rice intensification. *Journal of South China Agricultural University*, 27: 5-7, with English summary.

- Tao L.X., Wang X. and Min S.K. (2002). Physiological effects of SRI methods on the rice plant. In N. Uphoff et al., eds., *Assessment of the System of Rice Intensification*, CIIFAD, pp 126-132. (http://ciifad.cornell.edu/sri/procl/sri_29.pdf)
- Tao, S.S and J. Ma (2003). Improvement of the system of rice intensification (SRI) and its application in medium hybrid rice of the double cropping system. *Hybrid Rice*, 18: 47-48.
- Wang S.H., Cao W.X., Jiang D., Tai T.B. and Zhu Y. (2002). Physiological characteristics of high-yield techniques with SRI Rice. In N. Uphoff et al., eds., *Assessment of the System of Rice Intensification* CIIFAD, pp 116-124. (http://ciifad.cornell.edu/sri/procl/sri_27.pdf)
